SUMMARY

During my internship, I contributed to the development of live Flutter mobile applications from scratch to deployment. I gained hands-on experience in the Flutter framework, working with Firebase backend integration and consuming REST APIs to build dynamic, data-driven apps. I also designed and implemented user-friendly UI/UX interfaces using clean, responsive layouts that improved overall app usability and user experience.

WORK EXPERIENCE

JANUARY 2025 – JULY 2025

MDIDM INFOWAY
During my internship, I contributed to the development of live Flutter mobile applications from scratch to deployment. I gained hands-on experience in the Flutter framework, working with Firebase backend integration and consuming REST APIs to build dynamic, data-driven apps. I also designed and implemented user-friendly UI/UX interfaces using clean, responsive layouts that improved overall app usability and user experience.

LIVE PROJECT

Flutter, Dart, (setState)

Simple Flutter Billing & Stock Management App

- Developed a billing system to manage product stock with real-time quantity updates.
- Created itemized customer bills with PDF generation and sharing features.
- Designed a simple, responsive UI for easy billing and inventory handling.
- Used setState for state management without any external libraries.
- Demonstrated skills in business logic, PDF file handling, and UI/UX design.

Flutter, GetX, Google Maps API, API Integration

Live Dealer Finder App with Excel Import & Map Integration

- Imported dealer data from Excel and uploaded it to a backend via API.
- Retrieved dealer data and displayed locations on Google Maps with dynamic pins.
- Used GetX for efficient state management and navigation.
- Built a responsive map UI to help clients find nearby dealers.
- Demonstrated practical use of file handling, API communication, and map integration.

Flutter, Dart, Razorpay, Custom UI

Bag Selling E-Commerce App with Razorpay Integration

- Created an e-commerce app to browse and purchase various bags.
- Integrated Razorpay for secure and seamless online payments.
- Developed features like product list, add to cart, and order confirmation.
- Focused on clean UI design for a smooth user shopping experience.
- Showcased skills in payment gateway integration and Flutter UI building.

EDUCATION

BACHELOR OF COMPUTER APPLICATIONS (B.C.A)

Harivandna College, Rajkot
Pursuing

H.S.C (12TH COMMERCE)

Delta Science School, Upleta
Completed: 2023

SKILLS

- Proficient in Flutter development with strong command of Dart, Firebase, and responsive mobile UI design. Skilled in using Android Studio, VS Code, and Figma for app development
- and UI prototyping. Strong communication, problem-solving, and teamwork abilities with a
- continuous learning mindset.

KEY ACHIEVEMENTS

- Successfully contributed to live mobile application projects during internship at MDIDM Infoway, Rajkot.
- Built responsive and user-friendly UI screens using Flutter and Dart, enhancing overall app usability.

INTERESTS

- Mobile App Development
- Exploring New Technologies
- Coding Challenges & Problem Solving
- Learning through Live Projects

CERTIFICATES

- Flutter Development Certificate
